FOUR NEW BUILDINGS ARE PART OF A MAJOR AIRSIDE DEVELOPMENT AT SEBRING REGIONAL AIRPORT

Sebring Airport Authority has developed a new Hangar Complex concept for the vacant airside parcel, which borders the recently reconstructed Terminal Apron. This Hangar Complex will include an additional 50,000 square feet of commercial hangar space, which will focus on aviation related businesses. Grouped together, hangar buildings range in size from 8,000 square feet up to 15,000 square feet. The Hangar Complex, which will include dedicated parking areas, will be developed in phases, with the first hangar of 15,000 square feet scheduled for construction in 2022.

Additional short-term and long-term projects are in the works for Sebring Regional Airport that will bring new jobs and attract innovative businesses to the community.
